Profile

A Full-Stack **JavaScript** engineer with a **bachelor's degree in computer science** along with experience of **4 years in software development** and **1.5 years in sales**, marketing and customer management. **Building solutions on the web** for clients from all over the world, with multiple **service-based** and **product-based** companies

My expertise includes various domains including **Internet Privacy** and Security, Enterprise Resource Planning (**ERP**), Human Resource Management System (**HRMS**), **E-learning** for the Educational sector, **Bioinformatics** project with UCLA, IoT based solutions and many more.

Most of my **clients belonged to the USA** while some belonged to Europe, the Middle East, and other parts of the world

In my career, I have been involved in **fast-paced learning** of **emerging** and **legacy** technologies, deeply assessing and understanding current systems, building web **apps from scratch**, **dealing with clients directly**, **mentoring fellow engineers** and leading decision-making throughout the software development lifecycle (**SDLC**) following industry's **best practices** to produce **high-quality results on time**. As of now, I have only worked on closed-sourced projects but lately, I have started contributing to open-source software development (OSS)

Experience

SR. SOFTWARE DEVELOPMENT ENGINEER

Sep.2020 - Present

SECURITI.AI (FOUNDRI PVT. LTD.) - KARACHI, PAKISTAN

- Developing front-end using **Vue.js** (with **Vuetify**) for different modules within the product
- Building back-end as **RESTful APIs** in **Node.js** (with **Express.js**) using the **microservices** architecture with **Docker** in **Kubernetes** managed by **Helm**
- Execute development tasks and **mentor fellow engineers** on a daily basis and contribute to planning product features and enhancements for future sprints using **SCRUM**

SOFTWARE ENGINEER

Aug.2019 - Sep.2020

FOLIO3 PVT. LTD. - KARACHI, PAKISTAN

- Operated as a **Technical Consultant** for **Oracle NetSuite ERP** developing full-stack solutions using **SuiteScript 2.0** for customizing ERP functions and automating tasks
- **Interact with clients directly** by providing technical support, performing troubleshooting and resolving customer issues
- Alongside customizations, developed an HRMS **from the ground up** for Netsuite using **React.js** (with **Ant Design**) on the front-end and for the back-end we build **RESTful APIs** using NetSuite core modules by porting a **Node.js** (**Express.js**) server along with **MongoDB** as database

SOFTWARE ENGINEER I & II

Mar.2018 - Aug.2019

SCAYLE PVT. LTD. - KARACHI, PAKISTAN

- Worked as a **full-stack** developer for the **U.S. based** clients on **School Management** System, **Bioinformatics** research project with **UCLA**, IoT based solutions
- Developed new projects **from square one** and managed **maintenance** products. Deliver solutions utilising cloud infrastructure with **AWS** and **Azure** for **UCLA** project using **Node.js**
- Developed numerous web apps using **React.js** with **Ant Design**, **Angular 2+** with Material

WEB DEVELOPER
